

## Documents and Templates

Before submitting a proposal to become a new Node Provider, the Node Provider shall prepare two kinds of documents. The documents should be delivered as a PDF file that is digitally signed.

#### (B) Statement of provision of node machines

I hereby guarantee that I shall provide node machines in accordance with the required Hardware Configuration for running the IC Network, as described on the IC wiki (see [Node Provider Machine Hardware Guide](#)).

#### (C) Statement of good intent

I guarantee to the world that I shall honestly operate the node machines I provide, and that should I behave dishonestly, for example by deliberately interfering with my node machine(s) to prevent them correctly processing ICP protocol messages, in collusion with others or alone, that I will be liable to users of the network, and to other node providers, for any damages caused.

I further declare I am aware that any deliberate interference with a node machine, which causes it to incorrectly process ICP protocol messages, represents a misuse of that hardware, and of any hardware it interacts with, and that in some jurisdictions, that may constitute a crime.

Name and Signature of representatives

Nicolas Frund

### (2) Identity Proof

The Node Provider shall provide proof that the identity(ies) listed in the self-declaration exist in the real world. The proof can be any document that sufficiently proves the identity of the signers of the self-declaration to the community.
